QRlink
READER

identity ONE

Time until QR Code expiry: 00 : 56

The QRlink reader utilizes the latest in fast scan imaging technology and encryption to deliver a fast, highly secure and functional multi-technology reader solution. With various versions available with different outputs, the QRlink reader can be used in applications such as POS , time and attendance and door access by card or directly from Smartphone.

Feature	QRLink
Voltage range	5vDC to 16vDC
Current	Nominally 45mA - Peak to 100mA
Dimensions	120mm x 76mm x 21mm
Read technology	Combo reader version A – QR Code and Mifare Combo reader version B – QR Code and Mifare Desfire
Reader Output	Available with USB Keyboard, USB serial , RS485 , Weigand
Installation	Two piece. Base plate with snap in with locking screw body
Connection	USB – plug and play – no external power supply req RS485 and Weigand – wire termination
QR code encryption	Secure QR code with expiry and AES 128 bit data encryption
IP rating	Up to IP65 . Variable , depending on application and output configuration.
Operating temperature	-30 C to 65 C (-22 F to 150 F)
